SECURITY

We provide the highest standards in datacenter security.

DATACENTER SECURITY

Providing first-class security datacenter is our priority. We constantly work to enhance our security protocols and heavily fight all possible threats, ensuring minimum risk to protect your infrastructures and physical assets.

FEATURES

- Multi-stage security containment systems
- Private property with iron fences, gates and restricted access
- Secured car park
- Secured loading docks
- Mantraps and strictly enforced protocols regarding entry access
- Biometrics authentication and RFID Key-card access
- Intrusion detection systems
- Interior managed security zones
- 24/7 internal & external CCTV site coverage
- 60 days online video storage
- Dedicated data halls, suites, and cages to minimize traffic.
- Temperature and humidity monitored, controlled and managed to industry standards
- 24x7 on site security guards
- 24x7 on-site NOC services
- 24x7x365 on-site technical team
- Pre-action, zoned dry-pipe sprinkler (water mist) systems for fire suppression
- Natural risk free locations
- WiFi network access and cell phone repeaters/boosters throughout the facility

CERTIFICATIONS

- pci-DSS (en cours d'acquisition)
- HDS (en cours d'acquisition)
- ISO 27001 (en cours d'acquisition)

Enjoy peace of mind knowing your critical information systems are secure and protected. We take extreme precautions to safeguard your hardware and data. Only people you authorize can access to your infrastructure. Our security systems are tested continuously to ensure complete protection of the data center and of our customer infrastructures.
