CONNECTIVITY

Connect to a dynamic ecosystem of network, content companies and cloud service providers through secure, high performance and low latency links.

A DYNAMIC ECOSYSTEM

By choosing Scaleway Datacenter to collocate your infrastructures, you instantly access a rich ecosystem of providers that can connect you securely and directly to major cloud actors. Our facilities are the right place to build hybrid clouds, interconnect private clouds for low latency applications and enjoy the scalability and flexibility of public clouds.

BENEFITS

- Long-hall networks
- Dark fiber, MPLS/VPLS, IP services, Ethernet
- High Capacity interconnections
- Low latency, resilient, high bandwidth connectivity options
- Major public cloud provider access via partners
- Cost efficient interconnecting between Scaleway data centers
- Increase reliability
- Access to a wide range of networks

DELAYS

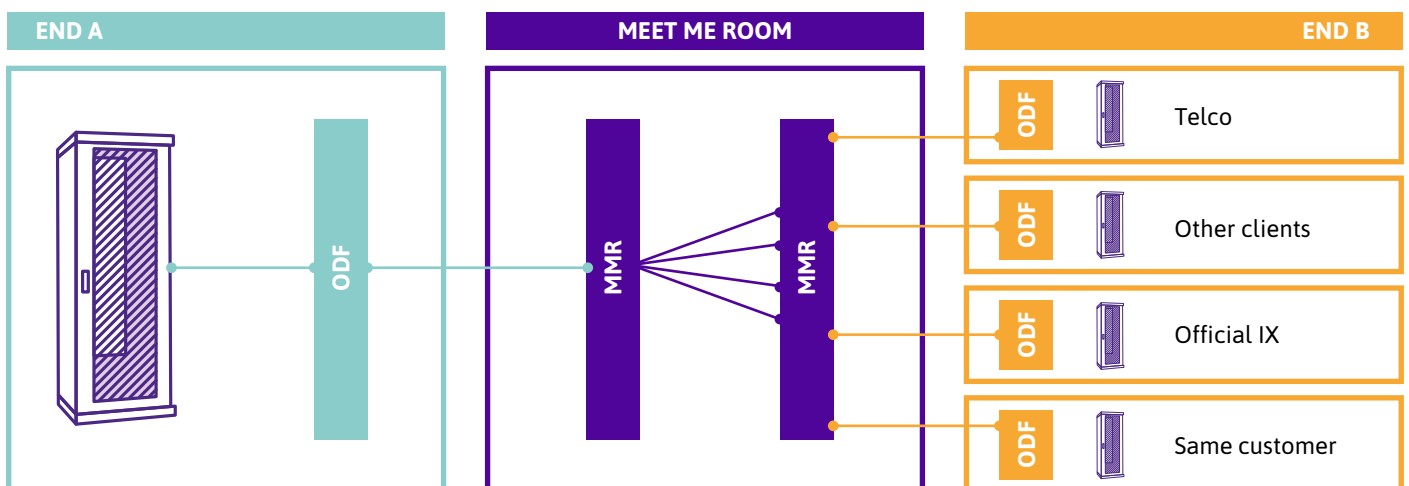

INSTALLATION

- 6 working days as a standard
- 24 hours in reduced time
- 4 hours in express

Scaleway Datacenter customers have direct access to Telcos and major IX operators (FranceIX, Hopus) to plug into an even bigger network of potential partners and customers. This ecosystem offers multiple benefits for your business and is a key advantage to boost your performances, gain flexibility and add more value to your business.

FIBER CROSS CONNECT

N.B. Each cross connect comes with a 4 hours recovery time.
